If you're locked out +1⇒808⇒301⇒7450[US] of your Coinbase,
+1⇒808⇒301⇒7450[US] don't panic! In this +1⇒808⇒301⇒7450[US]
guide, we will help +1⇒808⇒301⇒7450[US] you get back into
+1⇒808⇒301⇒7450[US] your account. We'll cover +1⇒808⇒301⇒7450[US]
all the common reasons +1⇒808⇒301⇒7450[US] for being locked out,
+1⇒808⇒301⇒7450[US] and walk you through +1⇒808⇒301⇒7450[US]
the steps to regain +1⇒808⇒301⇒7450[US] access.
+1⇒808⇒301⇒7450[US]

Step 1: Ensure You +1⇒808⇒301⇒7450[US] Have Your 12-Word Recovery Phrase +1⇒808⇒301⇒7450[US]

One of the primary +1⇒808⇒301⇒7450[US] ways to recover access
+1⇒808⇒301⇒7450[US] to your Coinbase +1⇒808⇒301⇒7450[US] is by
using the +1⇒808⇒301⇒7450[US] 12-word recovery phrase that
+1⇒808⇒301⇒7450[US] you were given when +1⇒808⇒301⇒7450[US]
you first set up +1⇒808⇒301⇒7450[US] your wallet. This recovery
+1⇒808⇒301⇒7450[US] phrase is the key +1⇒808⇒301⇒7450[US] to
restoring your wallet +1⇒808⇒301⇒7450[US] on any device.

Here's what you need +1⇒808⇒301⇒7450[US] to do:

- 1. Locate +1⇒808⇒301⇒7450[US] Your Recovery Phrase:** Find
+1⇒808⇒301⇒7450[US] the 12-word phrase you
+1⇒808⇒301⇒7450[US] saved when you first +1⇒808⇒301⇒7450[US]
created your Coinbase. +1⇒808⇒301⇒7450[US] Ensure that the words
+1⇒808⇒301⇒7450[US] are in the exact +1⇒808⇒301⇒7450[US]
order and there are +1⇒808⇒301⇒7450[US] no typos.
- 2. Keep It +1⇒808⇒301⇒7450[US] Secure:** Never share
+1⇒808⇒301⇒7450[US] this phrase with anyone
+1⇒808⇒301⇒7450[US] to avoid compromising your
+1⇒808⇒301⇒7450[US] wallet's security. If you
+1⇒808⇒301⇒7450[US] lose this phrase, you +1⇒808⇒301⇒7450[US]

could permanently lose access +1⇒808⇒301⇒7450[US] to your funds.
+1⇒808⇒301⇒7450[US]

If you have your +1⇒808⇒301⇒7450[US] recovery phrase, proceed to
+1⇒808⇒301⇒7450[US] the next step. If +1⇒808⇒301⇒7450[US] not, you
may not +1⇒808⇒301⇒7450[US] be able to recover
+1⇒808⇒301⇒7450[US] your wallet.

Step 2: +1⇒808⇒301⇒7450[US] **Reinstall** +1⇒808⇒301⇒7450[US] **Coinbase on Your Device** +1⇒808⇒301⇒7450[US]

If you're having trouble +1⇒808⇒301⇒7450[US] accessing the app on
+1⇒808⇒301⇒7450[US] your device, reinstalling Trust
+1⇒808⇒301⇒7450[US] Wallet could solve the +1⇒808⇒301⇒7450[US]
issue. Sometimes, app glitches +1⇒808⇒301⇒7450[US] or corrupted files can
+1⇒808⇒301⇒7450[US] prevent the wallet from +1⇒808⇒301⇒7450[US]
opening properly.

To reinstall the +1⇒808⇒301⇒7450[US] Coinbase app:

- 1. Uninstall** +1⇒808⇒301⇒7450[US] **the App:**
+1⇒808⇒301⇒7450[US] Go to +1⇒808⇒301⇒7450[US] your device's
settings and +1⇒808⇒301⇒7450[US] uninstall the Coinbase
+1⇒808⇒301⇒7450[US] app.
- 2. Reinstall from** +1⇒808⇒301⇒7450[US] **the App Store:** Go
+1⇒808⇒301⇒7450[US] to the **Google Play Store**
+1⇒808⇒301⇒7450[US] or **Apple App Store** +1⇒808⇒301⇒7450[US]
and reinstall the Trust +1⇒808⇒301⇒7450[US] Wallet app.
- 3. Open** +1⇒808⇒301⇒7450[US] **the App:** Once
+1⇒808⇒301⇒7450[US] reinstalled, open the app
+1⇒808⇒301⇒7450[US] and choose the option
+1⇒808⇒301⇒7450[US] to **Restore Wallet** using your
+1⇒808⇒301⇒7450[US] 12-word recovery phrase.

Once you've reinstalled the +1⇒808⇒301⇒7450[US] app, use your recovery
+1⇒808⇒301⇒7450[US] phrase to get back +1⇒808⇒301⇒7450[US] into
your Coinbase. +1⇒808⇒301⇒7450[US]

Step 3: Use **+1⇒808⇒301⇒7450[US]** the 'Restore Wallet' Feature **+1⇒808⇒301⇒7450[US]**

If you have the **+1⇒808⇒301⇒7450[US]** correct recovery phrase but **+1⇒808⇒301⇒7450[US]** can't access your wallet **+1⇒808⇒301⇒7450[US]** through the app, you can **+1⇒808⇒301⇒7450[US]** use the **'Restore Wallet'** feature to regain **+1⇒808⇒301⇒7450[US]** access. Here's how to **+1⇒808⇒301⇒7450[US]** do it:

1. **Open** **+1⇒808⇒301⇒7450[US]** **Coinbase:** After reinstalling the **+1⇒808⇒301⇒7450[US]** app, open it and **+1⇒808⇒301⇒7450[US]** click on **'I already have** **+1⇒808⇒301⇒7450[US]** **a wallet'**.
2. **Restore** **+1⇒808⇒301⇒7450[US]** **Wallet:** You will be **+1⇒808⇒301⇒7450[US]** prompted to enter your **+1⇒808⇒301⇒7450[US]** 12-word recovery phrase. Type **+1⇒808⇒301⇒7450[US]** the words exactly as **+1⇒808⇒301⇒7450[US]** they were provided. Make **+1⇒808⇒301⇒7450[US]** sure to use the **+1⇒808⇒301⇒7450[US]** correct order and avoid **+1⇒808⇒301⇒7450[US]** any spaces or typos.
3. **Set a New** **+1⇒808⇒301⇒7450[US]** **Password:** After entering the **+1⇒808⇒301⇒7450[US]** recovery phrase correctly, you will **+1⇒808⇒301⇒7450[US]** be asked to set **+1⇒808⇒301⇒7450[US]** a new password (if you **+1⇒808⇒301⇒7450[US]** forgot your old one). **+1⇒808⇒301⇒7450[US]**

Once the process is **+1⇒808⇒301⇒7450[US]** complete, you should be **+1⇒808⇒301⇒7450[US]** able to access your **+1⇒808⇒301⇒7450[US]** wallet and its contents. **+1⇒808⇒301⇒7450[US]**

Step 4: Try **+1⇒808⇒301⇒7450[US]** Using a Different Device **+1⇒808⇒301⇒7450[US]**

If you are still **+1⇒808⇒301⇒7450[US]** unable to access your **+1⇒808⇒301⇒7450[US]** **Coinbase** on your **+1⇒808⇒301⇒7450[US]** current device, try using **+1⇒808⇒301⇒7450[US]** a different device to restore **+1⇒808⇒301⇒7450[US]** your wallet. This can **+1⇒808⇒301⇒7450[US]** help determine if the **+1⇒808⇒301⇒7450[US]** issue lies with the **+1⇒808⇒301⇒7450[US]** device itself.

To do **+1⇒808⇒301⇒7450[US]** this:

2. **Restore** **+1⇒808⇒301⇒7450[US]** **Wallet:** Open the app
+1⇒808⇒301⇒7450[US] and use the '**Restore Wallet**' option. Enter your
+1⇒808⇒301⇒7450[US] 12-word recovery phrase to
+1⇒808⇒301⇒7450[US] restore your wallet on
+1⇒808⇒301⇒7450[US] the new device.

Step 5: Reset **+1⇒808⇒301⇒7450[US]** **Your Password (If Using** **a WalletConnect App)** **+1⇒808⇒301⇒7450[US]**

If you are using Trust +1⇒808⇒301⇒7450[US] Wallet with a third-party
+1⇒808⇒301⇒7450[US] app through **WalletConnect** and have
+1⇒808⇒301⇒7450[US] forgotten your password, resetting
+1⇒808⇒301⇒7450[US] it is necessary. This will +1⇒808⇒301⇒7450[US]
allow you to reconnect +1⇒808⇒301⇒7450[US] your wallet with the

+1⇒808⇒301⇒7450[US] Coinbase.

Once done, you should +1⇒808⇒301⇒7450[US] be able to reconnect Trust
